ICUDDR International Survey of Universities in 2019

- Survey **administered electronically** to members of the International Consortium of Universities for Drug Demand Reduction (ICUDDR)
- Lengthy survey (70 questions), available in **English and Spanish**
- 79 of 160 members responded (50%) from **69 universities** in **36 countries**

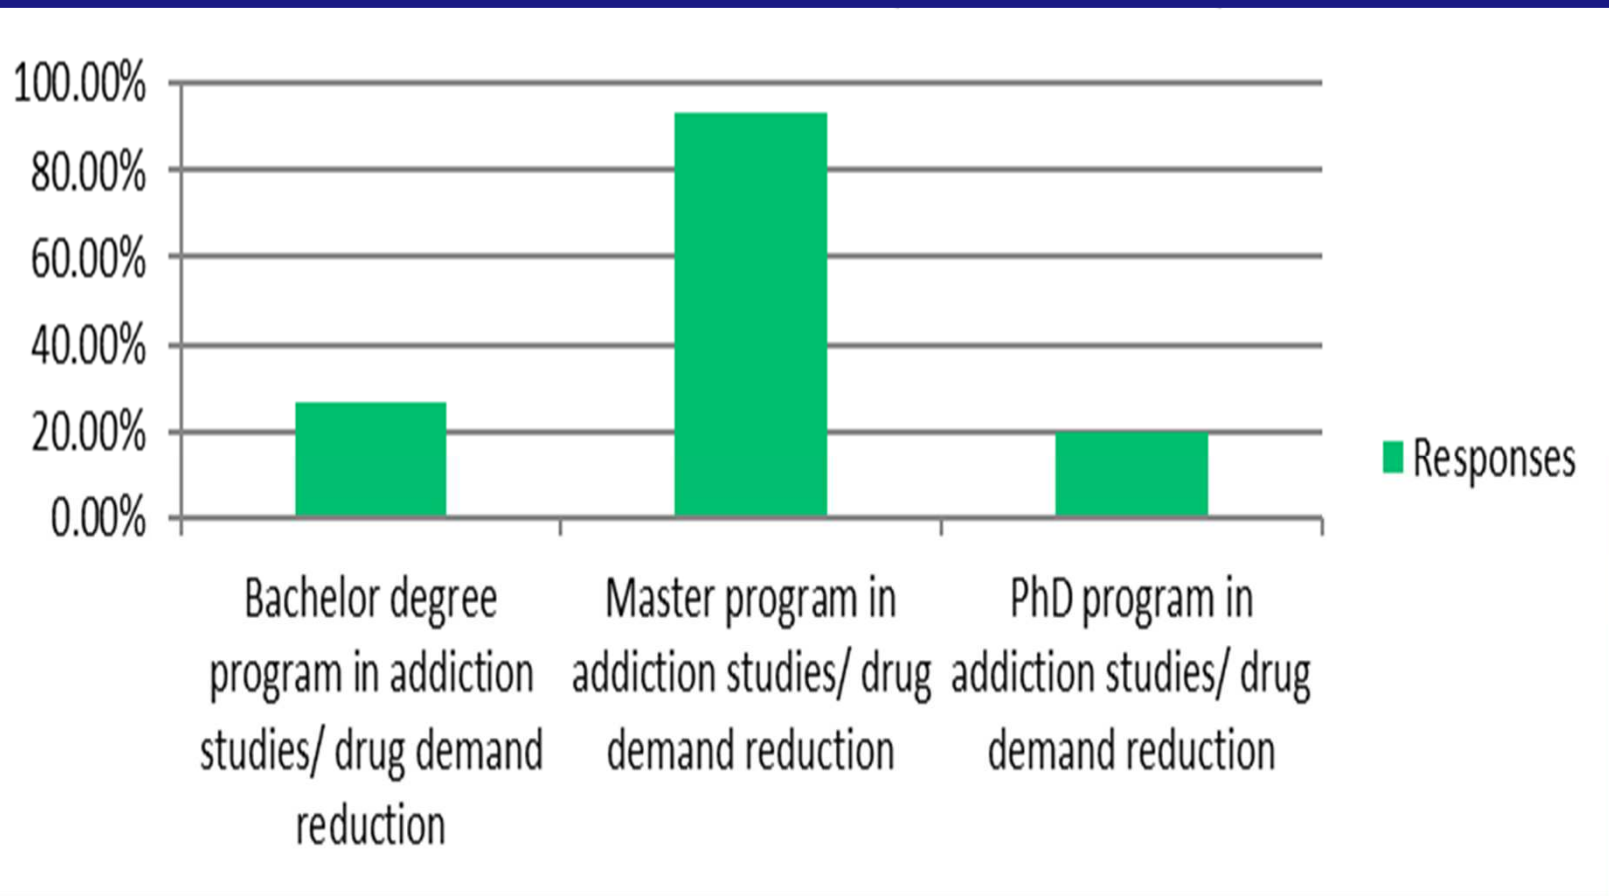

Which of the following are important ways that ICUDDR could help you?

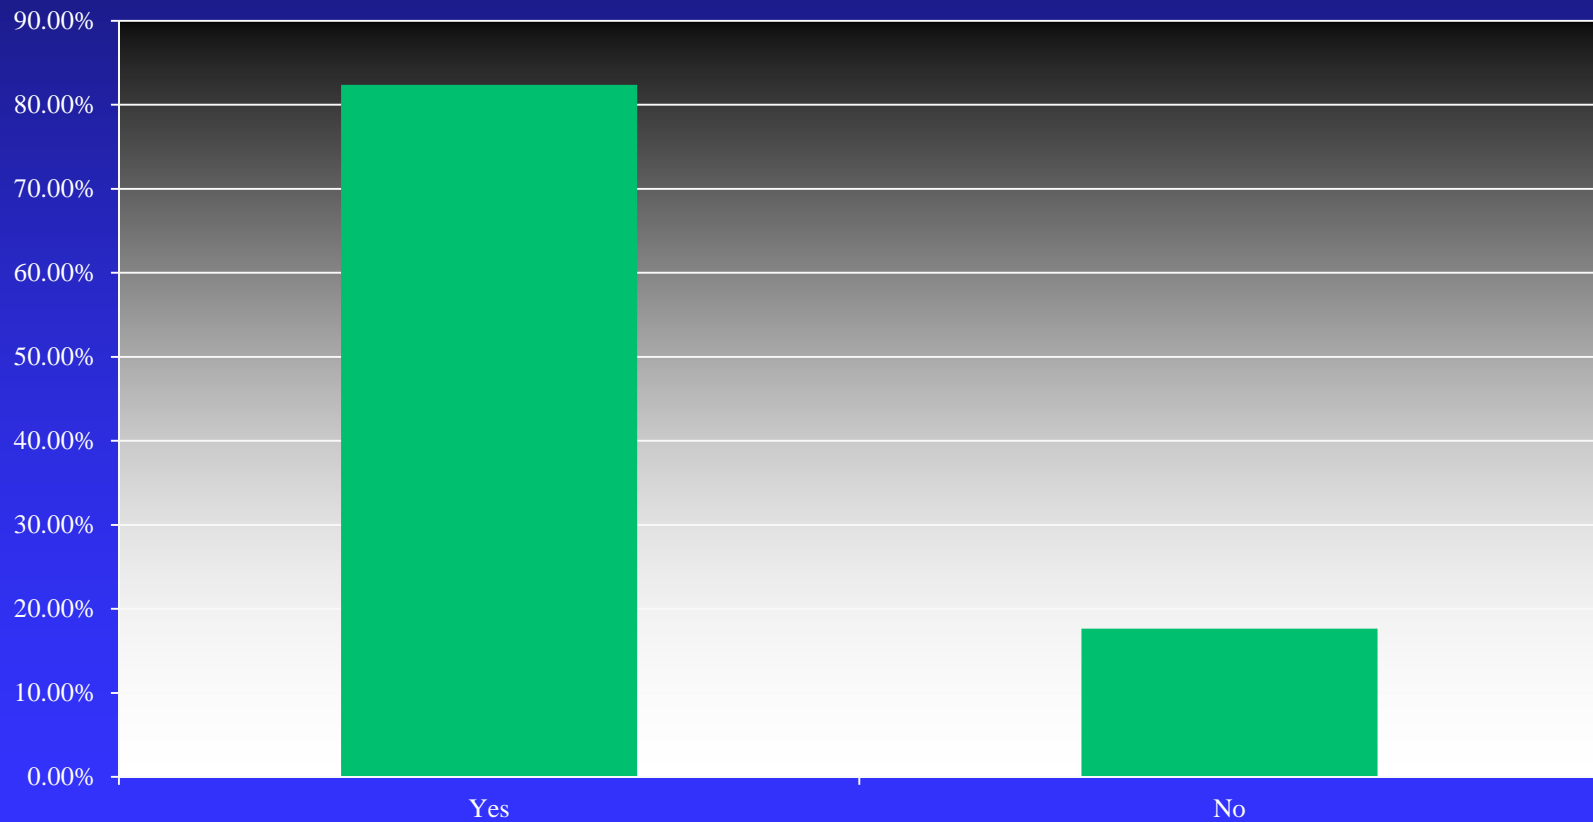

Degree Programs Offered?

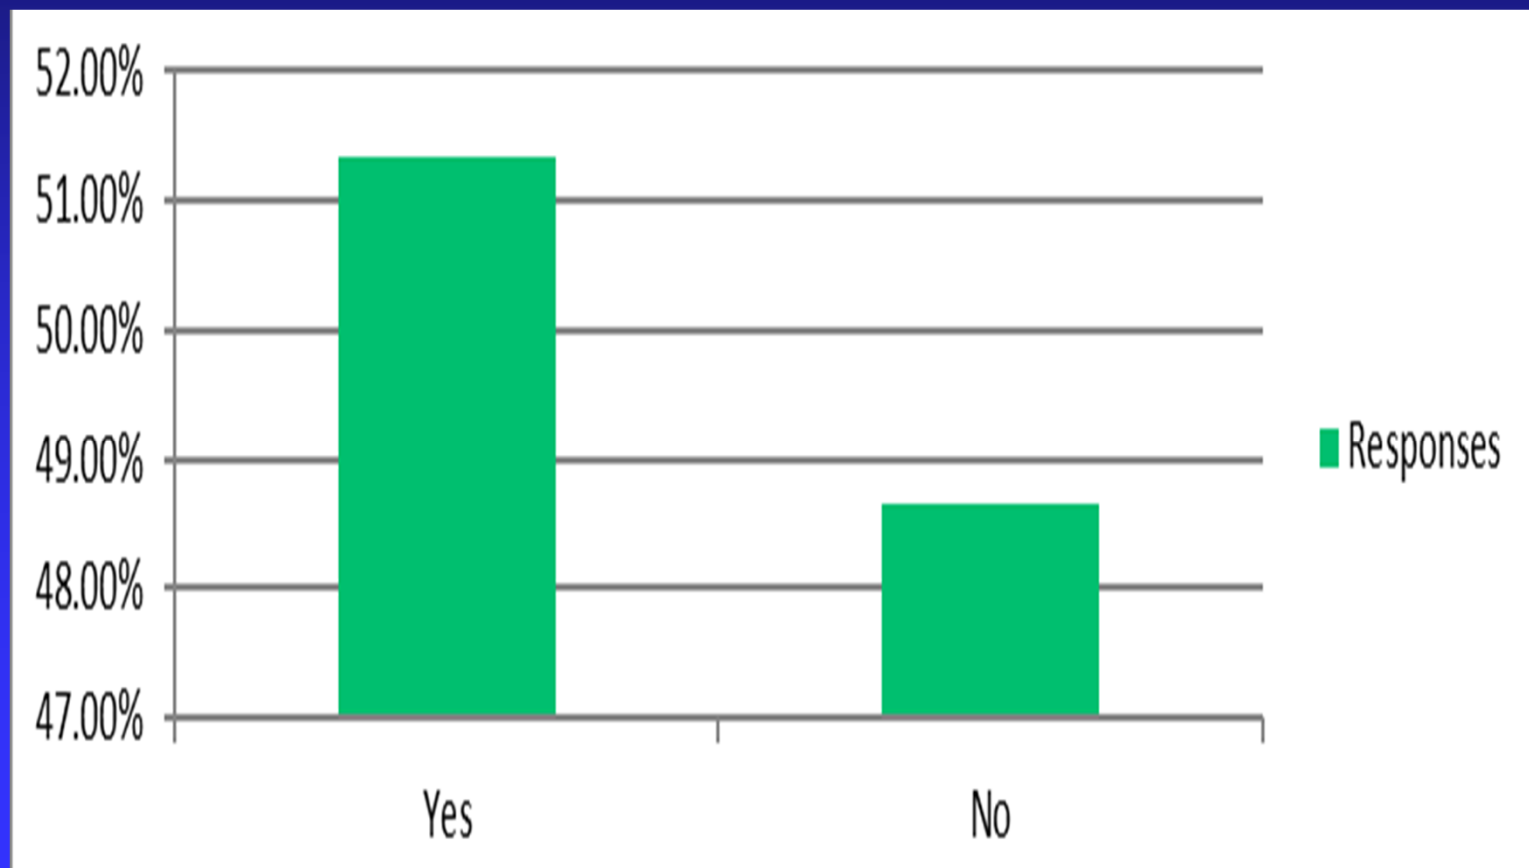

Types of Degree Programs Offered by Respondents

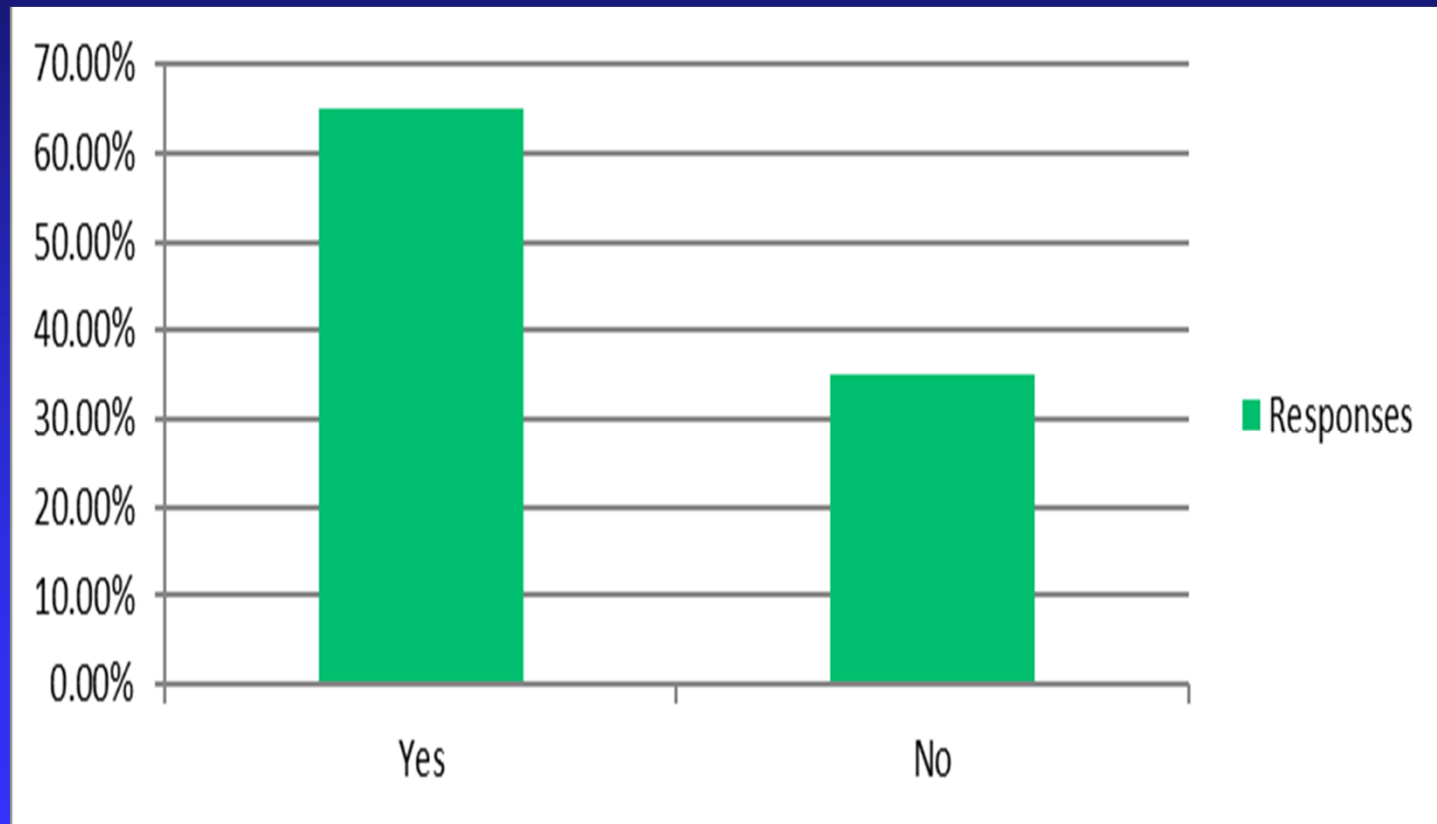

Degree Programs with a Clinical Component

Offer Courses in Addiction-Related Topics but no Degrees

Continuing Education Programs

Survey of North American Universities in 2018-2019

- **Combined data** from Charles University survey (2019), ATTC network, NIDA, and internet search by UTC Coordinating Center
- **373 universities** host academic programs in addiction studies
 - 16 Ph.D./doctoral level
 - 91 master's level
 - 199 undergraduate level (126 AA, 73 bachelor's)
 - 201 certificate programs

In Summary:

- Survey of **69 ICUDDR member universities**
- Universities have a **wide range of needs** related to addiction studies programs
- Few offer formal degree programs
 - The majority of these are **master's degree programs**
- Most offer **coursework and certification** programs in addiction studies

In Summary:

- Survey of North American universities used **combined sources** of data
- **Large number** of universities (373) have academic programs in addiction studies
- Most programs are at the **certificate or undergraduate** level
- **Relatively few Ph.D. programs**, and a moderate number of master's programs
- Interest in joining **university network**
